Helena Carvalho

Assistant Professor in DEMI/FCT/UNL

2012 PhD in Industrial Engineering 2004 MSc in Industrial Engineering 2001 BSc in Physics Engineering

http://docentes.fct.unl.pt/hmlc/

Objectives

Currently I'm developing research in the following domains:

- Supply chain resilience
- Sustainability in business ecosystems
- Eco-efficiency and eco-innovation
- Lean and green operations management

Methodology

- Analytical tools: Simulation
- Qualitative methods: Case study, Delphi methodology and Interpretative structural modelling (ISM)

Expected Results

- Modelling resilience in supply chains
- Improve organizations and business ecosystem economic, social and environmental performance.
- Identify the tradeoffs among different management paradigms in supply chain context
